

WWSP Pipeline Business Opportunities

The Willamette Water Supply Program (WWSP) has pre-qualified nine prime contractors to bid on upcoming water transmission pipeline construction. Willamette Water Supply System construction involves large-diameter, mortar-lined, welded steel pipe that requires special expertise for installation. The contractors were selected based on factors that include experience with similar pipeline construction, safety records, and ability to perform the work. WWSP pipeline construction is divided into several smaller projects, each with various business opportunities. Businesses interested in providing goods and services should contact the following pre-qualified prime contractors:

- Emery & Sons Construction Group—Lance Greaves 503-588-7576
- Garney Companies, Inc.— Matt Foster 816-746-7219
- James W. Fowler Co.— John Fowler 503-623-5373
- Kerr Contractors Oregon, Inc.— Alan Aplin 971-216-0050
- Moore Excavation, Inc.— Amber Hutchison 503-674-0900
- Pacific Civil & Infrastructure, Inc.— Andrew Albrecht 253-874-3965
- Ranger Pipelines, Inc.— Steven Kendall 415-822-3700
- Scarsella Bros., Inc.— Patty Brush 253-872-7173
- SJ Louis Construction, Inc.— John Pennekamp 320-253-9291

Goods and Services

Needs for each project vary, with each contractor selecting their own subcontractors to support construction. Some of the goods and services that will be needed from the business community to construct the Willamette Water Supply System include, but are not limited to:

- | | | | |
|-------------------|---------------------|----------------------------------|----------------------|
| ✓ Traffic Control | ✓ Equipment Rentals | ✓ Erosion/Sediment Control | ✓ Concrete |
| ✓ Welding | ✓ Fuels and Oils | ✓ Equipment Maintenance Services | ✓ Portable Toilets |
| ✓ Truck Drivers | ✓ Signage | ✓ Pavement/Road Construction | ✓ Aggregate Supplies |

Our Future Water Supply

Tualatin Valley Water District (TVWD) and the City of Hillsboro are partnering to develop the mid-Willamette River at Wilsonville as an additional water supply source. There is enough water for today—but steps need to be taken now to have an adequate supply to meet future demands and provide greater reliability.
