

Wilsonville Area Pipeline Project

The Willamette Water Supply Program is coordinating with the City of Wilsonville to construct a water pipeline along with the 5th Street/Kinsman Road Extension Project.

This project represents one of many partnership opportunities along the 30-mile Willamette Water Supply Program pipeline route. Construction for the road and pipeline project is planned to begin in the summer of 2018, with completion anticipated in 2019.

This agency coordination will reduce community and neighborhood impacts by eliminating the need for multiple construction projects.

Preliminary pipeline route is subject to change.

About the Willamette Water Supply Program

The Tualatin Valley Water District (TVWD) and the City of Hillsboro are partnering to build the Willamette Water Supply System, an additional, seismically resilient water supply for Washington County. The new system will be completed in 2026. TVWD and City of Hillsboro rates are paying for the water supply project pipeline and other related water facilities.

Our Future Water Supply

The Willamette Water Supply Program is a partnership between Tualatin Valley Water District and the City of Hillsboro to develop the mid-Willamette River at Wilsonville as an additional water supply source. This new system, when operational in 2026, will provide a reliable water supply for the region by helping water system operators balance supply during times of drought or other supply interruptions, as well as recover more quickly after a large natural disaster.
