

Garden Acres Road & Willamette Water Pipeline Construction

Construction activities are scheduled to begin on Monday, July 15 and last thru 2020. The City’s contractor, Moore Excavation, will begin work to extend utilities, add bike and pedestrian improvements and widen Garden Acres Road in the coming weeks.

This project represents the first step to support future industrial development in the Coffee Creek and Basalt Creek areas and to promote creation of a high-wage employment area within Wilsonville.

Construction will occur during daytime hours between 7:00 am and 5:00 pm. Work will begin with removal of vegetation and ground clearing along the east side of Garden Acres Road and both sides of Ridder Road.

Garden Acres Road will be closed during several phases of pipeline construction.

As utility pipe and the 66-inch Willamette Water Supply pipeline are installed along Garden Acres Road, a mobile work zone and road closure will be established. A temporary paved access will be provided along Cahalin Road for properties north of the road closure to enter and exit the area. When construction concludes, the temporary access will be restored to its original condition.

In addition, the intersection of Clutter / Ridder / Garden Acres will be closed for a six-week period in winter 2020 to rebuild the intersection.

Individual driveway access will be provided at all times for the duration of the project.

Access for emergency vehicles and garbage service will be maintained during construction. During periods of active construction, some traffic delays, short-term utility service interruption, and construction noise are likely. We will continue to work with you during these temporary inconvenience to keep you informed.

Your safety is important to us.

During this work, detours and work site hazards will be clearly marked. Please observe posted signs and respect barricaded areas to protect the safety of you, those in your care, neighbors and workers at the site.
