

Wilsonville Area Pipeline Project Phase I

The Willamette Water Supply Program is coordinating with the City of Wilsonville to construct a water pipeline along with the 5th Street/Kinsman Road Extension Project.

This project represents one of many partnership opportunities along the 30-mile Willamette Water Supply Program pipeline route. Construction for the pipeline project began in the fall of 2019, with completion anticipated for February 2021. The 5th Street/Kinsman Road Extension Project is scheduled to begin construction in March 2021.

This agency coordination will reduce community and neighborhood impacts by eliminating the need for multiple construction projects.

Our Future Water Supply

The Willamette Water Supply Program (WWSP) is a partnership between Tualatin Valley Water District, the City of Hillsboro and the City of Beaverton to develop the mid-Willamette River at Wilsonville as an additional water supply source. This new system, when operational in 2026, will provide a reliable water supply for the region while also helping water system operators balance supply during times of drought or other supply interruptions, and recover more quickly after a large natural disaster.
