The Willamette Water Supply System (WWSS) MPE_1.0 project is a partnership between the Tualatin Valley Water District (TVWD), City of Hillsboro, and City of Beaverton to build a new seismically resilient drinking water system by 2026. The project combines planned improvements by TVWD with WWSS and the City of Beaverton water construction projects. The combined project maximizes cost-effectiveness and reduces community and environmental construction impacts. Those living, traveling, working, and shopping along portions of SW Scholls Ferry Road, SW Hall Boulevard, SW Cascade Avenue, SW Allen Boulevard and Western Avenue can expect various construction activities from the fall of 2021 until the fall of 2024.
