

# Willamette Water Supply

## Our Reliable Water Future

### Wilsonville Area Pipeline Project (PLM 1.3)

#### Project Overview

The Willamette Water Supply Program (WWSP) is coordinating with the City of Wilsonville to construct a 66-inch, welded steel water pipeline from just south of Wilsonville Road to Garden Acres Road. It will connect the segments of previously installed pipeline in Wilsonville with the alignment following SW Kinsman Road, SW Boeckman Road, SW 95th Avenue, and SW Ridder Road.

#### Upcoming Construction

Pre-construction activities for the PLM 1.3 pipeline began in late 2022 with construction anticipated to be complete in 2025. Construction is occurring in phases to enhance safety and minimize traffic, neighborhood, and business disruptions. Phases include:

- SW Wilsonville and SW Kinsman Rd. trenchless crossing
- SW Boeckman Rd. to SW Ridder Rd. pipeline installation

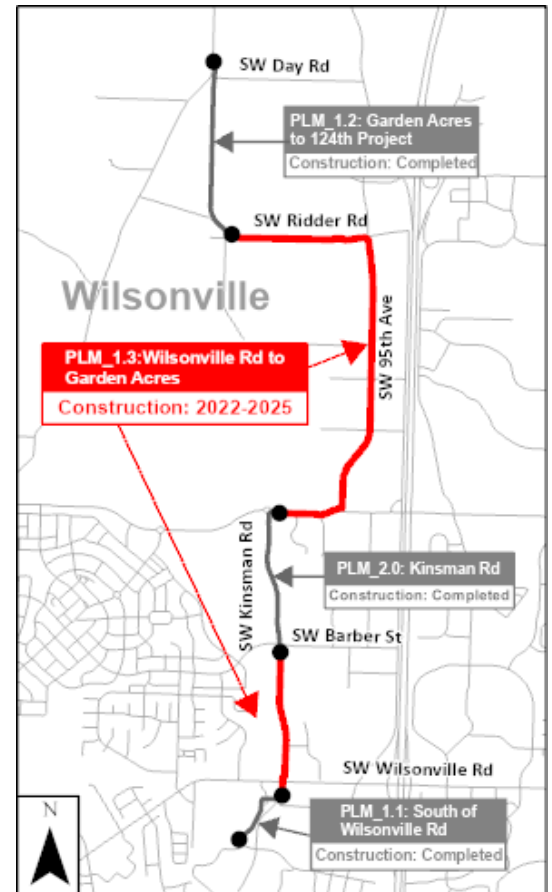

SW 95<sup>th</sup> segments include:

- SW Hillman Ct. north to SW Ridder Rd.
- SW Hillman Ct. south to SW Boeckman Rd.

- SW Kinsman to SW Barber St. pipeline installation

#### Schedule (Tentative)

Pre-construction (Limited Notice to Proceed)	February 2022
Start Construction	Late 2022
Anticipated project Completion	February 2025

### Our Future Water Supply

The WWSP is a partnership between Tualatin Valley Water District, the City of Hillsboro, and the City of Beaverton to develop the mid-Willamette River at Wilsonville as an additional water supply source and will be paid for by those ratepayers. This new system, when operational in 2026, will provide a reliable water supply for the region while also helping water system operators balance supply during times of drought or other supply interruptions, and recover more quickly after a large natural disaster.
